

Shreyam Kanaujiya

Kanpur Nagar, UP | shreyam91183@gmail.com | +91 6392764845 | LinkedIn | GitHub | Portfolio

Software Engineer with 3+ years of experience building applications using **React.js, Java, Spring Boot, microservices, and REST APIs**, across healthcare and enterprise environments. Hands-on experience with **Python, FastAPI, RAG, AI Agents, LLM-powered applications, Docker, AWS, CI/CD, PostgreSQL, and MySQL**.

Technical Skills

Languages: Java, Python, JavaScript, SQL

Frontend: React.js, Next.js, TypeScript

Backend: Spring Boot, FastAPI, Node.js, Express.js, REST APIs, Microservices

Databases: PostgreSQL, MySQL

AI/GenAI: RAG, Agentic AI, LLMs, OpenAI API, Embeddings, Vector Search, pgvector

Cloud & DevOps: AWS, Azure, Docker, Git, GitHub Actions, CI/CD

Professional Experience

Full-Stack Developer (Freelance) | HerbalMG

Jun 2024 – Present

- Collaborated with a cross-functional team to develop and optimize **RAG solutions for a client**, working on **document ingestion, embedding generation, vector search**, and **LLM-based response generation**.
- Built and deployed a production **e-commerce platform** using **React.js, Node.js, Express.js, and PostgreSQL**, supporting **5,000+ products, 500+ daily visitors, and 50+ daily orders**.
- Developed REST APIs for authentication, products, orders, payments, and shipping; improved API response times by **25%** through **query optimization, indexing, and pagination**.
- Reduced product catalog load time from **5.2s to 2.9s** using **virtualization, lazy loading, memoization, and code splitting**.

Junior Software Engineer | Cognizant – Pune

Sep 2022 – May 2024

- Contributed to a **healthcare platform** using **Java, Spring Boot, React.js, and microservices**, with application services containerized using **Docker** and deployed in **AWS environments**
- Developed and integrated **15+ Spring Boot REST APIs and microservices**, implementing request validation, business logic, error handling, and service workflows.
- Wrote **100+ JUnit test cases** for Java and **Spring Boot components**, validating **backend business logic** and **supporting reliable feature delivery**.
- Automated processing of **10,000+ Excel records** using Java and **Apache POI**, reducing manual effort by **90%** and saving **30–40 minutes per file**.

Software Engineer Intern | Cognizant – Pune

Feb 2022 – Aug 2022

- Contributed to a **claims management application** using Angular, Java, Spring Boot, and microservices, delivering features across **6+ application modules**.
- Developed and integrated features across Angular and Spring Boot services using REST APIs and **Swagger** for API testing and documentation across **30+ endpoints**.

Personal Projects

OpsMind — Secure Enterprise RAG & AI Assistant

GitHub

- Built a secure enterprise AI knowledge platform using **Next.js, TypeScript, FastAPI, Python, PostgreSQL, and pgvector**, with RAG-based document ingestion, embeddings, vector search, and grounded LLM responses with source citations.
- Implemented **JWT authentication, RBAC, access scopes, retrieval-time authorization, prompt-injection guardrails, and AI tool calling** to ensure secure and controlled knowledge retrieval.
- Built a **feedback-driven knowledge improvement workflow** where admin-approved feedback becomes verified knowledge, is embedded and indexed, and improves future RAG responses.

DevBoard – Engineering Decision Platform

GitHub

- Built a platform to centralize **architectural decisions, repository activity, pull requests, and technical documentation** across software projects.
- Integrated **GitHub APIs and Webhooks** with LLM-based analysis to process repository activity and generate structured **ARCHITECTURE.md** documentation.
- Used **pgvector semantic search** to compare pull request changes with existing architectural decisions and identify potential conflicts.

Education

Bachelor of Technology in Computer Science

Aug 2018 – Jul 2022

Pranveer Singh Institute of Technology
